

Container Wash Cart

Mobile Open Container Wash Cart: The cart is designed for the washing and cleaning of instrument containers, and container covers.

Construction: Constructed of tubular stainless steel that forms the base and frame of the cart, with three (3) slanted shelves to house containers on a wash angle required to ensure all areas of the containers are properly sanitized. The complete cart is robotically welded to the frame to provide additional structural rigidity. The lower sub frame provides added rigid support.

Casters: All casters are high temperature stainless steel, cart washable with non-marking thermoplastic rubber wheels. Four (4) 6.3" (160 mm) swivel casters, 2 c/w front locking brakes as standard. Caster capacity of 220 lbs. (100 kg) per caster.

*Optional - Container cover shelf - holds up to 24 lids.

Model No.	Shelves	Width " / mm	Depth " / mm	Height " / mm
W-CONT	3 (std)	40.25" (1025 mm)	27.6" (700mm)	55.6" (1412 mm)
WW-CONT	Cover Shelf	45.6" (1158 mm)	25.25" (642 mm)
