

# Sterilizer Carts

**Mobile Open Sterilizer Carts:** Designed for the sterilization of instrument containers, wrap sets, and other sterile items.

**Construction:** Manufactured with 1" (25 mm) tubular stainless steel that forms the removable and adjustable shelves on 7 sets of runners. The bottom solid shelf is robotically welded to the frame to provide additional support. The shelf runners are designed to hold either ISO shelves or sterilization baskets. Two (2) stainless steel swivel bar stops are mounted on either side of the cart, and lock into place to ensure trays, shelves and baskets remain secure during transport.

**Casters:** All casters are high temperature stainless steel with non-marking thermoplastic rubber wheels. Four (4) 5" (125 mm) swivel casters, 2 c/w front locking brakes as standard. Caster capacity of 220 lbs (100 kg) per caster.

#### Options for STERI-CART:

- ISO stainless steel shelves
- ISO SS baskets, (4"), (5") and (8") deep
